

**National Status: Not Scarce, Neophyte**

**S Hants: Infrequent**

Neophyte

Scattered across South Hampshire by pond and stream margins, and in most places a blatant introduction. Also recorded for the Moors River, Ferndown (SU10A) and Pylewell (SZ39T).

#### **N Hants: Scarce**

Neophyte

On the edges of ponds where in all cases it had probably been originally introduced. Sometimes it forms very extensive marginal patches, but it rarely flowers so must spread vegetatively. There are early unlocalised records at Winnall meadows (SU43V) in 1863, Basingstoke (SU65) in 1851, and near Headley (SU83) in c.1650-56.
