

Ajuga chamaepitys (L.) Schreb.**Ground-pine
1760-2013****National Status: Endangered, Rare, Native
NERC S41
UK BAP Priority Species
WCA Schedule 8****S Hants: Extinct**

Native

Longwood Warren	SU5325, SU5326	1770-1898
Galley Down, Bishops Waltham	SU5719	1957
W of Farlington Redoubt	SU6806	1930- ?1945

N Hants : Rare

Native

There are many old records that can only be assigned to tetrad level at best: Quarley Hill (SU24R) in 1940; Harewood Forest (SU34W) in 1933-1992 (probably near the site at Augurs Hill Copse); Near Cow Down (SU34X) in 1942; NE of Ibthorpe (SU35X) in 1969; Cheriton (SU52Z) in 1934; Near gate into cornfield by A303 W of Micheldever (SU54B) in 1972-1982; Laverstoke area (SU54C) in 1990 and Field beyond Popham Tunnel now ploughed (SU54H) in 1942. It is much decreased and now approaching extinction under current land management, though the introduction of the Higher Level Stewardship scheme may save it at a few sites if the management is suitably tailored. Typically for an annual plant of arable habitats its populations fluctuate from year to year at any particular spot.

Augurs Hill Copse, S of **SU3842** **1933-2000**

Augurs Hill Copse, Harewood Forest	SU383426	1992	MFW	Single plant at field margin alongside footpath.
Augurs Hill Copse, Harewood Forest	SU383427	1992	MFW	Along field margin under Augurs Hill Copse.
Nr Augurs Hill Copse	SU383428	1999	BGo	SU3834 4282. Five flowering plants in area 350m x 1m. 1m wide strip at edge of arable field protected from spraying in recent years.
Augurs Hill Copse, Harewood Forest	SU384428	1974	IM	
Augurs Hill Copse	SU385427	Aug-69	MMcK	On high ground near edge of Harewood Forest, SNHS visit, Aug 1969, det. RPB. Very near a different site at SU384428 first recorded by RPB in 1969.
Field Nr Augur's Hill Copse	SU385428	10-Aug-00	JRM	0 in 2000, 8 in 99, 1 in 98, 8 in 97 and 12 in 96.
S of Augurs Hill Copse	SU385428	20-Aug-00	ARGM	5 plants.
Augurs Hill Copse, S of Andover	SU386427	1985	PJW et al	

Sutton Scotney, NE of **SU4539** **1943****Freefolk Wood, field margin** **SU4944,
SU5043** **1981-2013**

Freefolk Wood, Micheldever	SU4944	1991	WMK	Edge of cornfield, Freefolk, Micheldever.
Field Nr Freefolk Wood, Micheldever	SU503438	31-Jul-01	JRM	12 plants. Field about to go into arable stewardship and no herbicide was applied this year.
Freefolk Wood, SE of	SU503439	14-Aug-11	ARGM & DC & AMSt	12 plants on headland strip, all close to fenceline, and most flowers over. 1 at SU50396 43918, 4 at SU50398 43919, 1 at SU50397 43918, 1 at SU50394 43916, 4 at SU50393 43916, 1 at SU50386 43915.
Freefolk Wood, S of	SU503439	19-Jul-10	GKn	In a c.50m stretch along northern field margin. 43 counted but count was not comprehensive (I know Plantlife recorded 77 individuals a month or so later).
Upper Cranbourne Farm, Freefolk Field, northern edge	SU504438	25-Aug-12	JRM	10 mature plants towards E end of headland, 1 towards W end
Upper Cranbourne Farm, Freefolk Field,	SU504438	04-Jul-11	JRM	Three immature plants fairly close together about 40% down the headland.

northern edge Field near Freefolk Wood, north end, Upper Cranbourne Farm	SU504438	21-Jul-09	JRM	46 plants spread along nearly whole length of headland. Headland well-cultivated spring 2009. [Counts here by JRM: 12 in 2001, 4 in 2002, 7 in 2003, 25 in 2004, 2 in 2005, none in 2006-2008].
Freefolk Wood, S of	SU504439	07-Aug-13	SMe	Just three plants. The vegetation had been 'topped' and was dried up.
Freefolk Wood, S of	SU504439	18-Aug-12	SMe	15 plants at SU 5040 4392, northern edge of arable field.
Freefolk Wood SE of	SU504439	24-Jul-10	ARGM & ReNHS	30 plants at SU5040 4392.
Freefolk Beech Break	SU505436	1997	Pla	HBIC record.
Micheldever Station, E of	SU5042	1972		
Roundwood Estate Roundwood Estate	SU5043 SU508438	2009 Aug-2009	PJW	Two plants in game cover crop.
Bramdown Copse	SU5247	1956
