

Fumaria vaillantii, 1990-2023, at least 6 fig grid ref **Best to Search: mid June - mid August**

Yellow highlighting is for sites I favour visiting first

Site Name	Gridref	Date	Comment
NE of Stockbridge Down	SU377354	19-Aug-00	BAP 18. One flowering plant on SW margin of wheat field at SU3778 3543, specimen conf. FR.
Leckford, SE	SU385365	22-Aug-98	Hb.AB Specimen Bi2003.24.71, edge of rape field, conf. FR [Specimen labelled SU3737 in error, and omits full date - ARGM]
Crawley	SU42713421	20-Jul-20	Single plant noted, minute sepals, apiculate fruits longer than wide. Confirmed from photos by BSBI Fumaria Referee, Tim Rich.
Upper Norton Farm, bridleway NE of	SU485437	20-Jul-02	Specimen piece from single plant on S side of track at SU4858 4373 at edge of corn crop. Has minute sepals less than 1mm x 0.5mm, total length of the white flowers 4mm, largest is nearly 5mm.
Roundwood Estate	SU507445	01-Jan-93	
Roundwood Estate	SU513448	01-Aug-09	Single plant at SU513448 in north-west corner of field know as 'Down North-East'.
Field west of Bramdown Copse	SU525473	01-Aug-08	along north edge of field, near hedge
Malshanger, Garden Piece field	SU567534	01-Jan-14	Grid ref. is for centre of field. IAPA species score 7, overall score for field 17. [Although her report does not overtly give a more precise grid reference it does include a map showing the rarities found and this indicates a location at roughly SU5664 5334. There is a 1998 record for this rarity on the same estate about 1km further NE which helps to validate the record - Tony Mundell].

I have omitted some earlier records, or duplicates, with the same grid reference.

I have no landowner contact for some of these sites.
