

Juncus compressus, 1990-2023, at least 6 fig grid ref Best to Search: early June - late August

Yellow highlighting is for sites I favour visiting first

Site Name	Gridref	Date	Comment
Headbourne Worthy	SU492318	01-Aug-16	At SU4927 3183, a small population noted in the gutter of the outside lane of the A34, on a small bridge over a tributary of the River Itchen. Recorded whilst stuck in a traffic jam. [Precise grid reference inferred from a very detailed map and description handed to Tony Mundell by Paul Stanley on 26 Nov 2016]
Warnborough Green	SU730519	27-Jun-11	Four patches at SU7305 5198. Much declined in recent years, back in 1973 it was recorded as widespread and abundant here.
Warnborough Green	SU730520	27-Jun-11	One patch at SU7308 5202 and seven small patches at SU7308 5201. Much declined in recent years, back in 1973 it was recorded as widespread and abundant here.
Warnborough Green	SU730520	15-Jun-10	Scattered plants in bud at SU73070 52018.
Warnborough Green, North Warnborough	SU731520	10-Jun-07	At SU7311 5205.

I have omitted some earlier records, or duplicates, with the same grid reference.
