

Lysimachia minima, 1990-2023, at least 6 fig grid ref **Best to Search: mid June - mid September**

Yellow highlighting is for sites I favour visiting first

Site Name	Gridref	Date	Comment
Heath Warren South	SU767593	12-Jul-03	At SU767593
Birch Bottom	SU767593	23-Jul-97	Groups of 40 + 60 plants on minor track.
Birch Bottom / Hulford's Bottom	SU767593	22-Jul-97	c.100 plants on minor track leading down to Birch Bottom.
Birch Bottom / Hulford's Bottom	SU767594	22-Jul-97	210 plants on minor track leading down to Birch Bottom.
Birch Bottom / Hulford's Bottom	SU768591	22-Jul-96	c.40 plants on minor track in Birch Bottom.
Birch Bottom / Hulford's Bottom	SU769590	23-Jul-97	750+ plants in three groups on minor track in Birch Bottom.
Birch Bottom / Hulford's Bottom	SU769590	22-Jul-96	Along c.20m of minor track in Birch Bottom.
Woolmer Forest	SU790326	02-Oct-91	[However, CRH later doubted his record and wondered if the shrivelled-up plants had only been <i>A. arvensis</i> . He was informed in 1992 that <i>A. minima</i> had been confirmed there, but it is not known by whom - ARGM]. [Not re-found by Tony Mundell, Phil Collier et al on 4 Aug 2022. Even when the Danger Flags are lowered there is now no public access to this area around the actual firing range butts]
Longmoor, airstrip.	SU808314	16-Jul-07	Locally abundant at SU8089 3140, carpeting the ground, mixed with <i>Radiola linoides</i> .
MOD Longmoor	SU80903141	28-Jun-03	Hundreds of thousands of plants - totally dominant over 5m x 1m patch.

I have omitted some earlier records, or duplicates, with the same grid reference.

I suspect that the sites near Birch Bottom / Hulford's Bottom are no longer accessible - but worth checking this.
