

**Platanthera bifolia, 1990-2023, at least 6 fig grid ref**      **Best to Search: mid May - late June**

Yellow highlighting is for sites I favour visiting first

Site Name	Gridref	Date	Comment
Warren Hill Chalk - South	SU253481	17-Jul-06	DSS0062800002W09 [What does that mean?]
Warren Hill Chalk WS	SU25532475	17-Jul-06	Single plant, past flowering, identified vegetatively. [Grid ref incorrect, plots near Whiteparish in Wiltshire. I doubt vegetative i.d. for this!]
Micheldever Spoil Heaps	SU518449	04-Jun-10	Small specimen, 7 inches high at SU5186 4498, mostly in bud, the largest flower showing parallel pollinia.
Micheldever Spoil Heaps	SU51904466	14-Jun-21	1 flowering example.
Micheldever Spoil Heaps	SU519443	16-Jun-06	In small clearing at SU5195 4435. (Not refound by ARGM on 26 May 2009).
Micheldever Spoil Heaps	SU519443	08-Jun-05	Two flower spikes at SU5195 4432. (None refound by ARGM on 26 May 2009).
Micheldever Spoil Heaps	SU51954434	07-Jun-06	2-3 flowering spikes northern end of wood clearing
Selborne Common, South	SU736329	15-Jun-15	Two plants in thick bracken at SU7364 3296.
Selborne Common, South	SU736329	02-Jun-14	A single plant in thick bracken on Selborne Common at SU7364 3296. Possibly the only plant of this species extant in VC12.
Selborne Common, South	SU736329	16-Jun-13	Four plants in clearing among light Bracken at SU7367 3298.

I have omitted some earlier records, or duplicates, with the same grid reference.

Fast declining and probably now lost from VC12, but worth looking for.
