

Scleranthus annuus, 1990-2023, at least 6 fig grid ref**Best to Search: mid June - mid August**

Yellow highlighting is for sites I favour visiting first

Site Name	Gridref	Date	Comment
East Woodhay, S of	SU402598	04-Aug-05	26 plants along arable field edge beside footpath, SU4021 5989.
Huntsmoor Hill	SU532624	27-Jul-16	SU53270 62462 Ten plants in field corner.
Steventon Warren Farm, North Waltham	SU543451	01-Jan-91	Numerous plants in set-aside arable
Malshanger, Stoney Deane field	SU555519	04-Jul-14	Still a large population at SU55502 51995 at top end of grass strip where first found in 2013. IAPA species score 7, overall score for field 37. [None refound by Tony Mundell & Hants Flora Group 14 July 2018 as this area is now densely overgrown with sown Phalaris arundinacea]
Malshanger, Stoney Deane field	SU555519	21-Aug-13	300-500 plants estimated in northwest corner of field at top end of grass strip at SU55500 51995. IAPA species score 8, overall score for field 37.
Bramshill Common	SU752624	14-Aug-98	17 small plants in broken sward on disused track. [Not refound ARGM 28 Jun 2008, track recently bulldozed. Also not refound CRH 14 Jul 2010, track has been levelled and upgraded.]
The Slab, Bordon	SU781358	18-Aug-01	At SU7814 3586. [Not refound Tony Mundell 16 July 2018, though there is still much suitable bare sandy habitat].
Edenbrook Country Park, Bicycle Track area	SU78745477	27-Jun-22	Only 33 very dessiccated plants counted, where there was a huge colony last year at SU78739 54774 to SU78746 54773. Presumably they suffered in the April 2022 drought conditions.
Fleet, Edenbrook Country Park	SU78745477	08-Jul-21	Hundreds of plants, but many rather hidden under taller but quite sparse vegetation. This must be the best site for this rare Nationally Endangered plant in Hampshire.
Broxhead Common, playing field	SU806369	03-Jul-98	[Grid reference later amended when I found a long-kept, labelled specimen]
Fleet, Broomhurst Farm road verge	SU81245636	09-Jul-22	A single plant at SU81247 56368. This follows a splendid rotavating of the remaining part of the Red-tipped Cudweed site by Hampshire County Council in March 2022 (though over half of the former site is now lost under trees).
B3013 Minley Road Verge	SU812563	08-Jul-22	One plant growing with the Filago lutescens.
Broomhurst Farm, Fleet	SU812563	26-Jun-19	No sign of the Red-tipped Cudweed here, but six plants of Annual Knawel found.
Broomhurst Farm, Fleet	SU812563	30-Jun-10	Six small plants on road verge at SU8126 5637.
Broomhurst Farm, Fleet	SU812563	05-Nov-09	Six small plants in a small area at SU8125 5637 towards the northern end of this road verge site.
Bramshot Common, Southwood	SU834549	13-Jul-95	Sandy track, one plant. Ref. L-CRH-146. [Site destroyed - being developed for housing in 2023]

I have omitted some earlier records, or duplicates, with the same grid reference.

Worth searching at The Slab, Bordon
