

Utricularia minor, 1990-2023, at least 6 fig grid ref**Best to Search: mid June - late August**

Yellow highlighting is for sites I favour visiting first

Site Name	Gridref	Date	Comment
Fleet Pond Lnr	SU82105500	17-Jul-95	HBIC records to 2009
Fleet Pond area, nr Fugelmere Road	SU821548	01-Jan-91	1984-91. SU8215 5482 - SU8230 5480, declined during drought summers.
Fleet Pond	SU822547	01-Jan-90	
Fleet Pond, Fugelmere Marsh	SU823548	22-Jun-98	In a small pool dug for dragonflies at c.SU823548, with two flowers. It had appeared here in 1997 but has not been refound since 1998.
Fleet Pond LNR	SU823548	01-Jan-91	1984-91. SU8215 5482 - SU8230 5480, declined during drought summers.
Fleet Pond, Fugelmere Marsh	SU823549	07-Jun-95	A few plants in a shallow pool well out on Fugelmere Marsh, c.SU823549, now very much scarcer than it used to be.
Hawley Common south Site 29	SU84105745	23-Sep-03	HBIC records to 2009. (Not refound near SU841574 by Chris Hall in 2013 - all ditches dry).
Eelmoor Flash	SU842527	14-Aug-04	East side of Eelmoor Flash at SU8423 5276, 80+ plants on bed of a shallow pool. One plant collected and examined closely (both <i>U. australis</i> and <i>U. minor</i> are present).

I have omitted records for Eelmoor Marsh as currently being well studied.

I have searched for it unsuccessfully south of Hawley Pond, but probably worth another look at pond edge and in ditches or pools.
